Who We Are

Established in 2009, TCO is a professional information technology consulting firm, specializing in network design, software development, security, implementation and support services.

What Can We Do For You

TCO designs, implements and supports highly scalable and secure technologies for business and non-profits. Our solutions utilize best of breed technologies.

Why Choose Us

TCO explains technology in business terms. Our certified systems engineers are trained to solve problems to help improve your business and secure your network and applications. As an authorized partner with some of the industry's very best and forward thinking hardware and software vendors, we provide advanced solutions for your organization. Customer service drives our business model. Each member of the team is focused on providing quality technology solutions to meet your specific needs. **We are your flexible IT resource!**
